

Mobility Enablement & Integration

A Global software company needed a mobile interface to provide planning reports to its customers. Implementing an enterprise level mobility application for each customer was challenging from usability point of view. Client approached Achala to provide a mobility solution

OUR APPROACH

- ✓ Due diligence to validate the business benefit of doing an in-house development vs integration of third party vendors (RoamBi, QlikView)
- ✓ Recommended RoamBi solution for the client and conducted Gap analysis
- ✓ Implemented User Management, Directory Management, Data refresh automation modules
- ✓ Integrated RoamBi reporting templates with client data hosted in a cloud

Challenges

- ✓ Lack of Directory structure to store generated RBI files using OLAP data
- ✓ User authorization using LDAP was not possible directly on RoamBi
- ✓ Help on real time integration issues was minimal

Client Benefits

- ✓ Real time reports for client's customers available 24x7
- ✓ Client acquired new customers with mobility offerings. Big impact to customer top line
- ✓ Automation of reports has led to productivity improvements within customer teams
